

Neurology positions at the Brunei Neuroscience Stroke Rehabilitation Centre – join this dynamic and enthusiastic team!

The Brunei Neuroscience Stroke Rehabilitation Centre (BNSRC) is part of an exciting healthcare complex in Brunei Darussalam. This centre serving the neurological needs of the population of Brunei is housed in a new, state-of-the art, purpose-built facility overlooking the South China Sea. The centre provides a broad range of acute neurological and neurosurgical services with a full complement of neuroradiology and rehabilitation support services.

Brunei Darussalam has excellent schools, comprehensive healthcare facilities, good road networks, plentiful sporting and outdoor activities and is well-connected for international air travel. The residents of Brunei are warm and welcoming within a tolerant, multi-racial society.

You will join a dynamic, enthusiastic team of neurologists who are passionate about providing the highest standard of neurological care, and committed to continuous service development through evidence-based practice in a culture of robust clinical governance.

Positions available immediately are for:

- 1) Senior Specialist Neurologists with at least 10 years of experience following DM (Neurology) or equivalent
- 2) Specialist Neurologists with at least 5 years experience following DM (Neurology) or equivalent
- 3) Early career doctors with an interest in Neurology with preference given to those who have completed specialty training in Neurology.

Applicants from most medical schools in India which are on the list of recognised schools of the Brunei Medical Board would be eligible for medical registration conditional of an offer of employment. Applicants with DM (Neurology); post MD / MBBS is essential.

Preference will be given to those who have experience of working in comprehensive Neurology and/or stroke centres.

- Sub-specialty interest in epilepsy, neuromuscular disorder, movement disorder and neurophysiology are desirable but not essential
- Knowledge of neurophysiological tests and their interpretation is essential for Specialist positions

Successful applicants will have the opportunity to work in a growing team in a friendly, supportive working environment with attractive salary and benefits. There will be opportunities to be involved in both undergraduate and postgraduate medical education as well as for development of research interests.

For further information on the centre and the nature of the post, please contact Dr DS Nur'Ashikin Pg Tengah, Consultant Neurologist, Ministry of Health, Brunei Darussalam at nurashikin.tengah@gmail.com. More details can also be obtained from the centre's website, www.pjsc.com/bnsrc/.

Applicants who wish to apply directly may send their CVs to and request application forms from our Human Resources Department at recruitment@tbcc-bnsrc.com.
